

## **NEWS RELEASE FOR IMMEDIATE RELEASE**

### **Intuitive Research and Technology Corporation Employee Serves as Guest Speaker at the 2009 Boston Embedded System Conference**

**HUNTSVILLE, AL – September 28, 2009** – Intuitive Research and Technology Corporation (*INTUITIVE*) is pleased to announce that one of its employees was chosen to be a guest speaker at the 2009 Embedded System Conference held September 21-24 in Boston, MA. Charles Fulks, a senior engineer at *INTUITIVE*, presented a 75 minute informative session focused on model based design for FPGA development. This session demonstrated the use of a modeling tool to predict the performance of a programmable logic design in a mixed signal system.

*INTUITIVE* would like to congratulate Fulks on having his presentation selected as one of the Top Ten most popular papers/presentations for the conference and for continuing to set *INTUITIVE* apart as a leader in the field.

Charles Fulks has over 13 years experience developing programmable logic. He has worked on satellite communication, software defined radio, aviation, rocketry, and encryption projects. He presently leads the FPGA development group for *INTUITIVE* in Huntsville, Alabama. Charles holds a MSEE degree from the University of Central Florida and is a senior member of the IEEE.

**Intuitive Research and Technology Corporation** (*INTUITIVE*), a certified 8(a) Company and Small and Disadvantaged Business, supplies a wide range of services including programmatic support, systems engineering, product development, production systems support, rapid prototyping, and technology management solutions to the Department of Defense, government agencies, and commercial companies.
