

FOR IMMEDIATE RELEASE***INTUITIVE* Branching Out**

HUNTSVILLE, AL – September 2011 – Intuitive Research and Technology Corporation (*INTUITIVE*) within the past year has expanded its business development by adding two new departments individually led by Kevin “Ducky” Hoffman and Doug Bushey. Mr. Hoffman was added on in October 2010 to be the Director of Air Force Programs, and Mr. Bushey was added in June 2011 as the Director of Washington Programs.

INTUITIVE considers all the hard work and effort the leaders put into creating its strong foundations as paying off. In spite of the harsh restrictions of the current economic times, the Company has been able to move forward with opening these two new departments. As stated by *INTUITIVE*'s President and Co-founder, Harold Brewer:

“Offering our employees’ expertise into new areas was something that almost evolved naturally. As the company grew so did our reach and with that an expanding customer base. *INTUITIVE*'s foundation and structure allowed for seamless integration of both Air Force and Washington Programs, all we had to do was find the right people to lead the departments. We expect great things from their leadership and management.”

INTUITIVE is already known throughout the local community as a leader among leaders, and has consistently been gaining national recognition from awards ranging from Best Places to Work to SBA Small Business Prime Contractor of the Year. Employees from several departments have been sharing their subject matter expertise at conferences and workshops, increasing the awareness of updated technology as well as the strength in traditional proven methods. Having Mr. Hoffman and Mr. Bushey as part of the *INTUITIVE* Team, reinforces the positive direction of the company. Keeping an open mind and finding new ways to offer excellence in engineering and analysis stays true to the company motto “Committed to Excellence.”

Intuitive Research and Technology Corporation (*INTUITIVE*), a Small Business, supplies a wide range of services including programmatic support, systems engineering, product development, production systems support, rapid prototyping, and technology management solutions to the Department of Defense, government agencies, and commercial companies.
